IPM PARTNER® FIELD REPORTER  
MAY 19, 2010

**IMPORTANT NEWS FROM THE FIELD REPORTER STAFF:**

Erratic weather has made it difficult to determine some biofix dates, particularly for Codling Moth. Female Codling Moths emerge later than males at the start of the season. Sometimes it is only a few days delay, but it can be weeks later. Traps with DA or DA-Combo lures catch both males and females. If you are using them, you can determine whether females have emerged yet. This helps give another layer of confidence in determining a spray date.

**Kern County** (Delano/McFarland): **CM** – Biofix 4/5, 525DD. **OFM** – Biofix 3/1, 1086DD. No flight at this time. **PTB** – Biofix 4/1, 540DD. **CRS** – Biofix 3/24, 593DD. **SJS** – Biofix 3/18, 637DD. **OLR** – Biofix 3/14, 766DD. **NOW** – Biofix 4/28, 212DD. Significant egg laying over past two weeks.

**Tulare County** (NE Kingsburg area except where noted): **CM** (Visalia walnuts) – Biofix 4/12, 444DD. **CM** – Kingsburg Biofix 4/12, 665DD. **OFM** – Biofix 3/24 (change from previous report), 789DD. Shoot strikes present. **PTB** – Biofix 4/16, 400DD **CRS** (Visalia/Exeter) – Biofix 3/30, 391DD.

**Madera County:** **CM** – Biofix 4/20, 312DD. **OFM** - Biofix 3/22, 760DD. **PTB** – Biofix 4/15, 370DD. Heavy flight. **CRS** – Biofix 4/15, 399DD. **SJS** – Biofix 4/6, 400DD. **OLR** – Biofix 3/22, 616DD. Grapes are blooming. **NOW**- Biofix 4/15, 255DD. Lots of egg laying during past two weeks.

**Merced County** (Ballico & Winton areas): **CM** – Biofix 4/9, 386DD. **OFM** – Biofix 3/14, 823DD. **PTB** – Biofix 4/15, 351DD.

**Sacramento County** (Delta area): **CM** – Biofix 4/9, 386DD. First female moths trapped 4/18.

**Yuba County** (Marysville): **CM** – Biofix 4/18, 390DD. **OFM** – Biofix 3/5, 1022DD.

**Butte County** (Gridley): **CM** – Biofix as early as 4/2 in some heavily infested orchards. 404DD since that date. In other orchards, moths first trapped yet. **OFM** – Biofix 3/15, 798DD. **PTB** – Biofix 4/27, 319DD.

Tréce is pleased to announce their latest scientific innovation, CIDETRAK® Mating Disruptant, an intelligently simple high performance dispenser for Codling Moth and Oriental Fruit Moth mating disruption. Also, don't forget PHEROCON® CM-DA COMBO multi-gender attractant for monitoring which will give you a definite edge in your battle against the codling moth, your toughest competition. This lure has been proven to be the most effective codling moth lure on the market today. For more information on CIDETRAK or DA and CM-DA COMBO lures, and how to interpret data from trap capture, contact Jeff Downs, National Sales Manager, at 559-285-8448.
