NOTE: The foregoing is supplied as a general information guideline only. This information is specific to the site location from which it was obtained. For optimum pest management decision making, each orchard site should be individually monitored with traps and environmental monitoring equipment.

We are coming to the end of the season

and it is time to discontinue the Field Reporter for the 27th season.

We trust that your season has been productive and rewarding, and we are pleased to have had an opportunity to provide some input.

Next season the Field Reporter will contain some new features. But we will stay with the same objective of providing you with a short, precise assessment of biological information for the key pests in your area.

Finally, we are pleased to thank our contributors to the Field Reporter for the 2015 season:

Kern County: Darryl Castro, Integrated Orchard Management

Tulare County: Jim Stewart, Ag IPM Consultants, Inc., & Chris Groenenberg

Merced County: Bill Thompson & Cindy Lashbrook, Four Seasons Ag Consulting

Madera County: Ken Schneider, Alluvial Agricultural Consulting

Sacramento and Yuba Counties: Randy Hansen

And a big "Hat's Off" to Randy Hansen who coordinates this for us from year to year.

CIDETRAK® DA MEC™ has been approved for organic use!

CIDETRAK DA MEC has Federal and State registrations for use in apples, pears and walnuts. It is available in 10, 20 and 40 acre container sizes.

Trece, the innovator in the semiochemical industry, has multiple, new advanced monitoring and control products now available, targeted to key insect invaders. For more information about Trece's new products, please visit our website at www.trece.com.
